

*A Snapshot of Community Mental Health Services: Report of a State Mental Health Agency Survey* summarizes the results of a state mental health agency (SMHA) survey conducted by NTAC and the Adult Services Division of the National Association of State Mental Health Program Directors (NASMHPD). The survey collected data on SMHA involvement with community-based services and supports, including case management, housing, employment, assertive community treatment, alternatives to hospitalization and consumer/family services. The report's sections contain descriptions of each service category, relevant innovative programs, and tables that summarize the responses of the SMHA respondents.
