El Paso Tragedy: Lessons in Disaster Response

Sonja Gaines
Deputy Executive Commissioner, Intellectual and Developmental Disability and Behavioral Health Services
El Paso Incident

• On Saturday August 3, 2019, at approximately 10:39am, a gunman entered a Walmart in El Paso and began shooting people.

• Approximately 3000 customers and 100 employees were in the store at the time the shooting began.

• The casualty count is currently at 22 dead and 26 injured.
Texas HHSC
Disaster Behavioral Health Teams

• Teams address the mental health impacts of emergencies on survivors and first responders.

• Teams are needed because people in and around disasters tend to experience distress and anxiety about safety, health and recovery.

• Teams come up with interventions that are incident specific.

• Teams coordinate with LMHAs who generally provide mental health services.
Texas has a National Leader in Mental Health Disaster Response

• DBHS Director Chance Freeman has led the response to more than 27 federally declared disasters
• He trains state and federal agencies, and contributed to a textbook used around the world to teach disaster behavioral health response.
• Chance leads a team of 12 disaster experts at the state level.
Survivors Helped by Disaster Response Teams

Survivors of natural disasters
- tornadoes, floods, hurricanes,
- earthquakes,
- wildfires, mudslides,
- and droughts.

Survivors of man-made disasters
- Mass shootings,
- chemical spills and terrorist attacks
State Response Timeline

1. On Sunday, August 4, the incident was declared a local disaster by the city of El Paso.

2. The HHSC Disaster Behavior health team was contacted and mobilized.

3. Network of LMHAs responded and coordinated to work in shifts: Bluebonnet Trails, Tropical Texas, Tarrant MHMR-Trauma informed trained

4. HHSC website landing page was updated to include local service locations and hotline numbers.

5. The Governor's office has granted permission for Victims of Crime Act (VOCA) grant
Crisis Resources:

Online Mental Health, Disaster and Violence Resources

MentalHealthTX.org
offers general information about mental health, signs, symptoms and interventions, Texas mental health resources and emergency contact information.

Coping with Grief After Community Violence
Introduces some of the signs of grief and anger after a community violence incident, provides useful information about how to cope with grief, and offers tips for helping children deal with grief.

Incidents of Mass Violence
provides a list of signs of emotional distress related to incidents of mass violence, details of lockdown notices and other warnings, and additional coping resources.

The Impact of Disaster and Mass Violence Events on Mental Health
provides common reactions disaster survivors may experience.
Supports Provided

1. Counseling support to victims and impacted community
2. Debriefing to first responders
3. 24/7 call Center live support
4. Web based resources available on LMHA and HHSC websites
5. DBHS provided on site support and connection to other federal resources
Course of Action

Disaster Behavioral Health Services (DBHS)

1. Facilitated conference call with Emergence Health Network and other stakeholders in Critical Incident Stress Management (CISM) to determine the status of services and recovery efforts.

2. Is actively working with provider fiscal personnel to track deployment activities and plan for longer term support.

3. Facilitated conference call with CISM teams that will deploy to provide first responder peer support in the coming weeks.

4. Conducted victim needs assessment review and is prepared to submit the results to the Governor's office by Friday August 16, 2019.

5. Daily Situation Reports.
What Have We Learned So Far?

1. Effective Collaboration at the community level before a crisis pays dividends in the time of a crisis.

2. Locally trained and responsive Mental Health resources with ability to partner to provide relief to responders.

3. Planning for and responding to criminal incidents is different than natural disasters.

4. Behavioral health responders need specialized training.

5. Management of spontaneous and well-meaning behavioral health volunteers is a full-time task.

6. Response activities seem to last longer than natural disasters.
Thank you
